DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This common bond brick commercial structure is three bays wide and four stories high. The first floor storefront facade complements the symmetrical fenestration of upper stories. The windows are double hung and ~~feature rounded upper corners~~, with two-over-two lights. They are highlighted by painted cast-iron or stone window caps and sills.

The first floor storefront is a false arcade and is faced in brick and cast-iron. Two central cast-iron columns with naturalistic detailing separate the entrance and flanking windows. These columns are mounted by brackets which support the storefront cornice underlined by modillions. Large flanking double brackets also buttress the cornice.

Entrance is obtained by central double doors. Each is composed of a single glass panel set in a wood frame. The door is capped by a rectangular glass transom above which is a glass tympanum formed by the false segmentally arched storefront arcade.

To the left of the entrance is an identical doorway now employed for display purposes. The right enclosure contains a large display window.

Each upper floor holds three windows. A geometric terra-cotta belt course accents the facade between the third and fourth floors.

The flat roof building is crowned by a simple cornice possessing a row of dentils below the fascia. It is further ornamented by extended molding carried by flanking detailed, narrow brackets.
